Lighting technology is constantly evolving and lights are getting brighter, stronger, and lasting longer with more efficiency. There are 3 distinct lighting technologies that shine the way for the automotive industry: LED Lighting, HID Lighting and Halogen Lighting. We will explore the differences and advantages to each type of lighting while learning about color temperatures of light, beam patterns, and manufacturing process to produce lights that withstand the freezes of Alaska to the blistering heat in Baja.

LED

(Light Emitting Diode)

Much of today's auxiliary light offerings are being driven by LED technology, it has many advantages including:

- Bright white light
- More light output in a smaller size
- Low power consumption
- No voltage spike at start-up (HID)
- 50,000 hour lifespan
- Increased durability with the absence of a bulb
- Higher Ingress Protection (IP) ratings

Many OEM Fog Lights like on the Jeep JK now have direct LED replacement kits for brighter and better visibility.

Vision X Lighting is also reaching the extreme distances of HID Technology with

single LEDs like the new 4.5" 25 watt Light Cannon, shining 1000' of usable light, shown below.

HID

(High Intensity Discharge)

HID Technology has been the leading source for shining long distances amongst high performance vehicles and race applications like Overland Adventures, Rally or Off-Road Desert Racing. HID is now common on luxury cars worldwide.

HID lights utilize:

- A bulb, starter and ballast to operate.
- The ballast takes the standard 12V input power and increases to bulbs operating voltage of 32,000V
- The starter is used to ignite the bulb

HIDs primary advantage over halogen is higher output per watt required. HID's are rated in their wattage, and several options are available. Vision X Lighting offers 35, 50, and 75 watt lights.

HID technology is also a great option for Vision X Lighting's HID Retrofit Headlight kits for UTVs. Each kit boosts stock lighting by 300% while using the same power consumption as factory.

HALOGEN

Halogen lighting technology has been the staple form of lighting amongst OEM applications for many years. Headlights, taillights, turn signals and auxiliary lighting.

Halogen lights operate standard at 12V. Halogen lighting provides for a cost effective lighting solution for aftermarket automotive applications including truck, SUVs, and off-road vehicles.

Vision X offers a number of different Halogen lighting options. The Tungsten-Halogen Series uses an oversized globe and specially engineered filament to enhance light output.

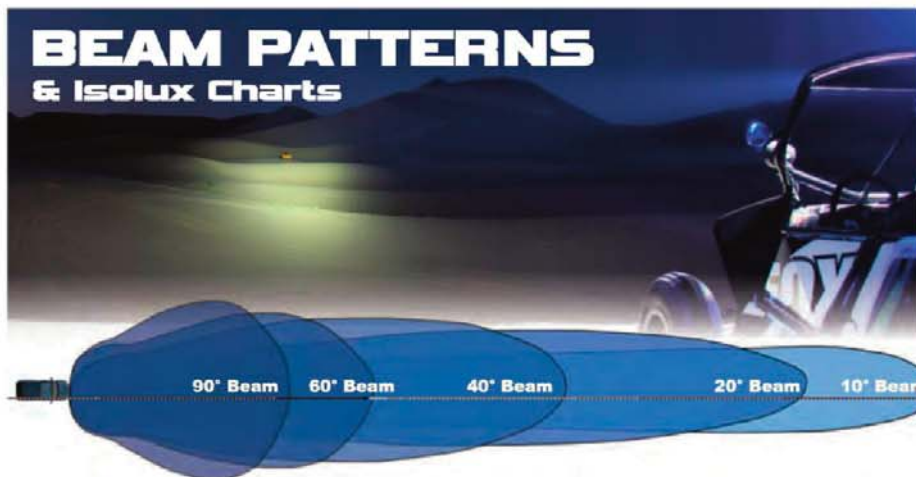

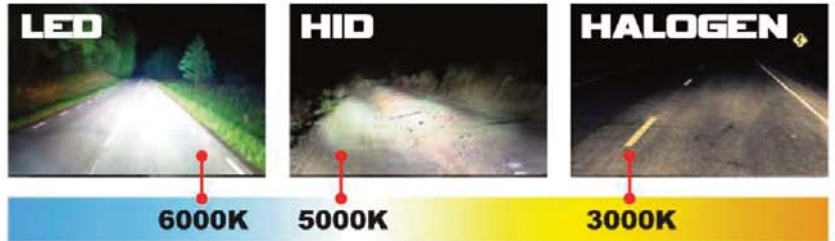

Also offered are D-Series, High, and Low Watt Headlight replacement bulbs which increase visibility on the road with super white light output.

LIGHT TEMPERATURE

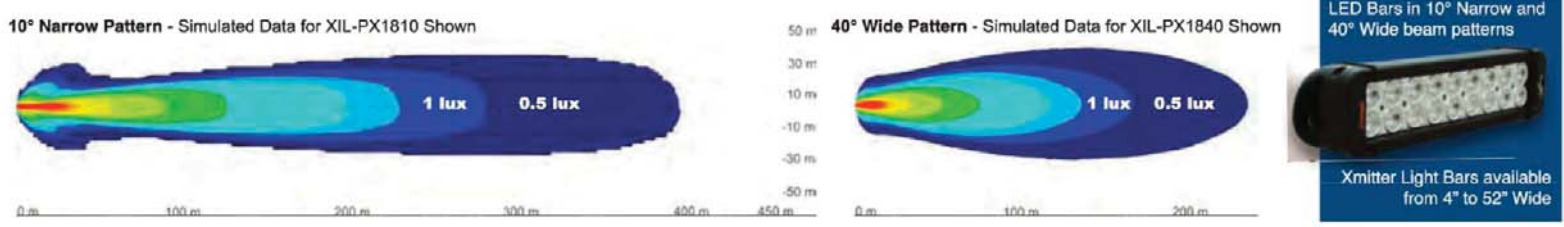

Light temperature is the light color that is seen by the eye. Halogen color (3000K) is considered warmer appearing more dull, while HID (5000K) and LED (6000K) feature temperatures with a much brighter, whiter color making objects appear more defined and natural as if seen in day light. Vision X Lighting has specifically engineered their light temperatures to be optimal in a multitude of driving conditions.

Spot beam (10°), Euro Beam (40°), Flood Beam (60°) all directly affect desired visibility. It's important to know the application that the light will be used when making the best recommendation.

- **Spot Beam (10°)** projects a long narrow beam, ideal for high speed driving
- **Euro Beam (40°)** patterns are common for most driving applications allowing good peripheral vision while projecting longer distance
- **Flood Beam (60°)** patterns are ideal for work lights or back-up lights

Most lighting manufactures offer Isolux charts to accurately share the beam pattern of each light and designate where visible light is displayed. Vision X determines usable light as light that is at least 1 lux. 1 Lux is the minimum amount of light needed to read a newspaper. What is lux? Lux is the amount of light in a square meter. When comparing a light's distance, utilizing usable light will allow you to determine the right light for your application. So, when reviewing Isolux charts, be sure lux is shown.

SWAP BEAM PATTERNS AND COLORS IN A SNAP! AN INDUSTRY FIRST!

The new Vision X Lighting 4.5" Light Cannon LED is the ONLY light available with a complete line of snap-on filters to quickly swap beam patterns for changing conditions on or off the road. Spot, Euro or Flood cover filters available in multiple colors make the Light Cannon like having 12 lights in 1. The large halo effect also provides a surprising amount of peripheral vision with no filter.

	EURO	SPOT	FLOOD
SNOW			
FOG			
DUST			

LIGHTING 101

MOUNTING

Vision X Lighting and others have direct bolt-on mounting brackets for adding or upgrading lighting. OEM Fog Light upgrades, flood back-up lights, and even LED dome light replacements are readily available to shine in the dark.

INSIDE LED LIGHTING

The most advanced LED Lighting systems of today strive to save consumers money, increase lifespan, reduce power consumption, and improve visibility under any driving condition. While many LED lights have a similar foundation of features and components, some design and engineering features separate the best from the rest. Here's a peek at how Vision X Lighting pushes the limits of LED Light technology:

- 1. Element Protection** - Ingress Protection rated at IP-68 signifying that it is both submersible in water and dustproof.
- 2. Next generation LED** - driven to 90% efficiency for higher lumen output per LED.
- 3. Channel Heat Sink** - Designed for superior heat dissipation to prolong the lifespan of the LEDs.
- 4. ETM** - Integrated Electronic Thermal Management to regulate heat levels to prolong the lifespan of the LED by engaging PWM.
- 5. Mounting System** - Integrated mounting system with isolated rubber mount for vibration control and 15° adjustability
- 6. PWM** - Pulse Width Modulation integrated circuitry flashes the LED faster than the human eye can see for reduced heat and prolonged LED life. PWM also allows for externally controlled dimming
- 7. Extruded Housing** - Rugged extruded 6061 aluminum housing for ultimate durability and protection
- 8. Pure Optics** - 90% optically pure acrylic lenses available in 10°, 25°, 40°, 60° and 30°x65° beam patterns.

LED Lighting

Revolutionary Off-Road LED Lights

Rigid Industries pioneered forward projecting, high intensity LED light bars and continues to revolutionize the market with the most efficient off-road LED lights for trucks, motorcycles and more. Our affordable LED truck lights are the brightest and most efficient off-road lights on the market. If you're looking for rugged and dependable truck lights, LED lights from Rigid Industries give you the durability and brightness you need for competitive or hobby off-roading. Choose a category, or contact us for a custom solution!

Brian Deegan Signature Series Dually
RIGBD20211

Dually LED and Dually D2 LED

- 20 degree flood pattern
- 10 degree spot pattern
- Unbreakable Lexan Lens
- 6061 Aluminum extrusion
- Plug and Play Wiring Harness with Switch
- 50,000+ hour life span
- Available in spot, flood, diffused
- No Hot spots
- No Vibration or bouncing beams
- 100% optically clear lens
- No Warm up, Instant on/off

E-Series Clear Spot Lamps

Each E-series product comes with our latest improvements. Those improvements include, a genuine Gore-Tex pressure equalizing system, ultra efficient heatsink, and the unmatched strength and durability Rigid is known for. Add in Rigid Industries limited lifetime warranty and unmatched customer service and the choice is clear.

- The brightest, most efficient LED light
- Superior optics and unmatched efficiency
- Highest lumen output per watt available on the market

SR-M Series Hybrid Flood Light

The new Rigid Industries Single Row Mini (SRM) will revolutionize LED lights, this time in the smallest and lightest fixture we have ever produced. Rigid has taken their patented optical system and encased it in a 100% magnesium housing. Now you have the ultimate versatility, more lux with less light. The light unit weighs in at an astonishing 6 oz, including hardware! With the Rigid optics you can still project almost 1000' with a Hybrid spot or produce an unbelievable 1050 raw lumens with the Specter optic. As with all the Rigid products, you can get U.S. MADE quality with a limited lifetime warranty and their unrivaled customer service backing up your purchase.

KC HiLITES Auxiliary Lighting & Accessories

KC 3" Cube Series LED Light

KC CUBE, High Performance LED lights. KC CUBE is brighter than other comparable LEDs on the market due to their greater efficiency and superior optics. Rugged, sealed aluminum construction designed for serious off road use and impenetrable to dust and water.

- Output: 1,800 Lumens
- Beam Pattern: Spot
- Total Watts: 20
- LED Life-Span: 50,000 hours
- Weight: 1.2 lbs, Waterproof: IP68 Certified
- KC Signature Turbine Air-Cooled Fin Design

Pair K/C300
Single K/C1300

KC 2" Cube Series LED Spot Light

KC CUBE, High Performance LED lights. KC CUBE is brighter than other comparable LEDs on the market due to their greater efficiency and superior optics. Rugged, sealed aluminum construction designed for serious off road use and impenetrable to dust and water.

- Output: 800 Lumens each
- 12w, each light
- LED: High Powered 3w x 4
- LED Life: 50,000 hours
- Housing: Extruded Aluminum 3 3/8" x 3 1/8" x 3 1/8"
- Weight: 3 lbs, each light
- Waterproof: IP68
- Side Mount Option Available
- Built in U.S.A.

Clear Light K/C320
Amber Light K/C319

KC C-SERIES LED LIGHT BARS

KC HiLITES C-Series LED Lights

KC HiLITES C-Series LED Lights are an affordable entry level of LED lights and LED Light Bars worthy of carrying the KC name. Sizes range from 3" to 50" to meet most all of your LED needs. Up to 288 Watt, on board thermal management, die cast mounting brackets, and 50,000 hour life.

KC LZR 4" Round LED Driving Light

KC's LZR Series of high performance LED lights represents the latest advancements in Light Emitting Diode lighting technology. One of the key features of KC LZRs is their super long life span of up to 50,000 hours! Plus, they are incredibly resistant to dust, water, shock and vibration. KC LZRs project an extremely even distribution of light and offer greater efficiency and superior optics to other LED lights on the market.

- Output: 2,400 Lumens (each light)
- Beam Pattern: Driving
- LED: High Powered 5w Cree XLAMP XP-G (x 6)
- Total Watts: 24, Amp Draw: 2.5a, Voltage Input: 9-36v
- LED Life-Span: 50,000 hours
- Weight: 1.75 lbs
- Waterproof: IP68 Certified

LED Lighting

L.E.D. Lightbar

- 12 Volt input
- Rugged 6061 aluminum housing
- Die cast aluminum end caps
- Submersible up to 10' IP
- 68 rated housing
- 50,000 hour lifespan
- Polycarbonate lens
- Weather proof connector & pigtail
- Marine grade input wire
- More Lumens per Watt than halogen or HID bulbs
- Lifetime Warranty
- Requires wiring harness and switch (76200)

Pro Comp Straight Edge LED Light Bars

These light bars can handle the punishment and not blink an eye due to the 15.6 G-Force vibration rating that's been engineered into every bar. Each SEL-Series LED Light Bar is equipped with a 3-watt CREE LED, the finest in the industry. The engineering and quality that goes into each light should make it your first choice but with the limited lifetime warranty it makes it your only choice for a SEL-LED light bar.

LED Lighting

ARB Intensity LED Driving Lights

The ARB Intensity LED light range has been specifically designed to meet the demanding requirements of 4 Wheelers throughout the world.

- High pressure cast aluminium body with virtually indestructible polycarbonate lens
- Hard coated, durable polycarbonate protective cover
- 32 LEDs with 50,000+ hour lifespan
- Goretex breather
- MIL810-STDG vibration certified, RoHS compliant
- Dust and waterproof to IP68 rating, Submersible to 3m
- Over and under voltage protection, Integrated thermal management
- Multi-position stainless steel mounting bracket
- Deutsch DT-06 waterproof connectors
- Engineered for use with the ARB Driving Light Loom (part no. 3500520)

Flood Beam AR32F
 Spot Beam AR32S

Speaker Engineered Lighting Solutions

5x7 Oval Silver

6 Inch Round Black

JW Speaker TS3000V LED Driving Light

JW Speaker Driving lights are made from rugged solid state LEDs that can withstand shock & vibration and are long-lasting meaning you'll never have to replace another bulb again! The die-cast aluminum housing provides maximum protection and the universal mount hardware makes it easy to mount in almost every situation.

- Silver or Black die cast aluminum housing
- Sold individually
- 12V or 24V light
- Driving Light: 60,000 max candela, DOT compliant
- Off-road Light: 117,500 max candela, Off-road only
- M10 x 1.50 x 40mm universal mounting bolt
- Weighs 3.0lbs.

Hella Rallye 4000 LED Driving Light

Hella's Rallye 4000 LED Driving Light is ideal for off-road racing, extreme terrain, long distance night vision and is legal for off-road use only. Features include: High-performance LED driving beam and LED position light with Kartoval optics. Die cast aluminum housing, reflector and mounting bracket can handle rigorous off-road driving conditions. Matte black powder coat housing with blue retaining ring and optics free glass lens for modern design.

- Universal
- Single lamp
- Harness not included
- Includes 1 each Rallye 4000 LED driving light, mounting hardware and instructions
- Multi voltage, suitable fro 12V DC or 24V DC

Driving Beam HLA011002101

Hella Micro FF LED Driving Light

Hella's Micro FF LED Driving Light vastly improves visibility in rural night driving and off-road driving conditions. Hella's Free Form LED Technology draws less power than traditional halogen technology while providing just as much illumination. Everything you need to install this lamp is included in the kit. Black powder coat finish.

- Universal
- Single lamp
- Kit includes: 1 each Micro FF LED flood lamp, wiring harness, mounting hardware and detailed mounting instructions
- Black powder coat finish
- Each lamp contains 6 high performance LED's
- Dust and waterproof

Driving Beam HLAH15176301

PIAA 530 High Intensity LED Fog Lamp Kit

The new PIAA 530 LED kit offers the beam control of a halogen lamp with the low power consumption and durability of an LED lamp. Unlike most LED lamps currently on the market that position the LED aimed straight out forward the 530 lamps aim the LED's at the reflector. This new orientation of the light source allows for far better beam control and output than the conventional layout. Combining the high output. In place of a traditional halogen bulb each lamp uses two 3 watt LED's producing a very white beam with a color temperature of 6000 Kelvin. LED's with a computer designed multi-surface reflector gives a true high performance light pattern in a lightweight, durable lamp that requires a fraction of the power used by a comparable halogen lamp.

Fog Beam PIA5370
 Driving Beam PIA5372

Delta Universal LED DRL Light Kit w/ 6 LED Lamps

- Universal LED, 7" Rectangle, Clear
- Pair

Fog/Driving Beam DTI01-1977-50L

Delta Universal LED Driving Light Kit - 2 3/4" Round w/ 4 LED Lamps

- Universal LED, 7" Rectangle, Clear
- Pair

Fog/Driving Beam DTI01-1987-50L

Truck-Lite 4" LED Lamp

Generates more even lighting, whiter and brighter than comparable incandescent work lamps. The LED light has no filament, therefore its extremely resistant to shock and vibration. The LED light uses less current draw, resulting in increased battery and alternator life while allowing more power for other vehicle requirements. Mounts using a 5/16"-18 stud. 5 year limited warranty.

- Universal fit
- Die cast aluminum housing
- 24-volt
- Polycarbonate lens with 6 light emitting diodes
- 18 gauge wire
- Mounts on one 5/16" - 18 stud
- Sold individually

Black Powder Coat - Flood Beam POI81250
 Black Powder Coat - Spot Beam POI81290
 Chrome Finish - Flood Beam POI81255
 Chrome Finish - Spot Beam POI81295
 White Powder Coat - Spot Beam POI81291

Truck-Lite 7" LED Spot Lamp

- Universal fit
- Black powder coat
- Corrosion resistant anodized aluminum housing
- Draws approximately 4.5 Amps @ 12V

- Polycarbonate lens
- 10 light emitting diodes, 1,500 lumen output
- 18 gauge wire
- Does not include bracket
- Sold individually

POI81701

HID Lighting

Optilux 4" HID Light

Compact 4" reflector size, internal ballast and a weight of less than 2lbs. makes for easier mounting with more options than standard HID lamps.

- 12V, 35W power usage
- Powerful HID lighting provides exceptional clarity in all driving conditions
- High impact ABS plastic housing with a stamped aluminum reflector and tempered glass lens
- Lamp includes internal ballast, xenon capsule, adjustable mounting

Optilux 4" HID Driving Light Kit

Hella's Optilux 4 inch HID Off-Road driving lamp kit is a great value in high-performance lighting. With features like internally mounted ballast and small but powerful 4 inch lenses, these lights can be mounted in places others can't. Rugged ABS plastic housing and tempered glass lens with removable clear cover make this an extremely durable light.

- Kit includes: 2 Optilux 4 inch HID driving lights with internal ballast, 2 clear protective stone shields, 2 Xenon capsules, 2 adjustable mounting brackets, wiring harness and detailed instructions

HLAH71020171

Rallye 4000 Xenon Light

Powerful long-range illumination that resembles daylight. Robust, black die-cast aluminum housing with red accent ring. Optimized reflector for more uniform illumination. Modern Design with glass lens. Knurled adjustment knobs for fast, easy adjustments without the need for special tools. Change the look of any Rallye 4000 Xenon Series lamp with our "NEW" Color Shieldz Protective Laminates available in Yellow, Smoke, or Blue shades. Narrow, intense, and extremely long stream of light. Light range for a single beam is up to 2,500 feet long and 120 feet wide. Intended for high speed off-road driving only. Xenon technology - a Xenon bulb provides nearly 3 times as much light as a modern H7 halogen bulb, but consumes only one third of the power. The light emitted by the Xenon bulb also has a whiter color temperature that is more similar to daylight than a halogen bulb.

- 9.1" x 8.7"W x 6.3"D

170 Striker HID Light Set

The 170 Striker already has many fans but wait until you see it perform in its HID pedigree. Despite its compact size, the combination of parabolic reflector and HID intensity Projects a beam that sends many competitors larger Lights running for cover. Its versatility makes it perhaps the consummate all rounder equally at home on a touring vehicle or pure bred race machine.

- Universal application
- 170mm round, compact size
- 12-volt
- Extreme long distance visibility
- Polycarbonate glass filled nylon construction
- Sold as a pair

170mm (6.8") Round	Driving Beam	L/FHID170T
--------------------	--------------	------------

240 Blitz HID Light Set

The 240 Blitz already has many fans but wait until you see it perform in its HID pedigree. Despite its compact size, the combination of parabolic reflector and HID intensity Projects a beam that sends many competitors larger Lights running for cover. Its versatility makes it perhaps the consummate all rounder equally at home on a touring vehicle or pure bred race machine.

- Universal application
- 240mm round
- 12-volt (24-volt also available)
- 5000°K Super White, closer to daylight, white brighter
- Long Life 3000 hour bulb
- Polycarbonate glass filled nylon construction
- Sold as a pair

242mm (9.5") Round	Driving Beam	L/FHID240T
--------------------	--------------	------------

Genesis 210 HID Light

Witness the revolution! Genesis had to be the ultimate system for the extreme operating conditions in every theatre of off-road motor sport. We listened to fabricators, drivers and customers, we dreamed, and created. Genesis's pedigree makes it the natural choice for any vehicle type or usage.

- Universal application
- HID bulb, spot light beam
- 210mm round
- 12 volt, 135 watt internal ballast
- Hard coated Polycarp Lens and filters
- Four different mounting options
- Genuine IP65 rating dust tight and waterproof with Gore-tex® breather (P57/67/68/IP69K) to protect against moisture/contaminant ingress
- Weight (single unit) 1.3 kg | 2lb 13.85oz - less than half the weight of our competitors

210mm (8.3") Round	Spot Beam	L/FDL210H
--------------------	-----------	-----------

DELTA

300H Series HID Bullet Driving Light Kit

Delta's all new HID Bullet Series Lights offer a bullet shape compact 3" design which feature high-tempered glass and fully rotating stem. Equipped with a Delta HID System with compact ballasts. This system produces near-daylight light in a new ultra-small footprint design. This light can be mounted nearly anywhere and provides illumination for the street, trail or anywhere you might need extra lighting. (T-Bracket windshield mounting brackets shown are available separately, but not included). Kit includes: 2 (ea) Bullet Lights, 2 (ea) 6000K HID Burners, 2 (ea) Mini-Ballasts, 1 (ea) wiring harness, Toggle illuminated metal switch and 30 A. Relay with waterproof fuse.

• Universal application
• 6000K HID burners
• Compact 3" light with ultra small footprint design
• High tempered glass
• Fully rotating stem

3" Round Driving Beam DTI01-3529-HID2

505 Series "Racing" Light Kit w/ Internal Ballast

Delta "Competition 505 Series HID's" were designed with professional racing in mind. They are encased in a tough 20-gauge steel housing, which are stylishly black powder coated or triple-chrome plated for durability and long lasting performance.

They are equipped with European prismatic lead-crystal lens for maximum photometric performance. These may be the toughest and most powerful racing / off-road lights ever offered. MADE IN USA. These lights are powered by our new Internal Ballast H.I.D. System which generates 20,000 Volts and a near daylight illumination but drawing only 5.8 AMPS. Each kit contains 2 internal ballast HID lamps, 2 covers, mounting hardware, and wiring harness with switch, fuse, and relay.

6" Round Driving Beam DTI01-6150-HDB2

550 Series Hi/Lo 60/55W Light Kit

Delta's driving series lights provide stylish upgrades to factory equipment. Vastly outperforms factory driving lights, providing you increased safety and visibility. Delta Tech Industries has been manufacturing quality lighting products for over 30 years and continues to create innovative lighting solutions for your vehicles.

ARB

IPF 800xs Extreme H9 Spot Light Kit

Designed for serious 4WDers, these extreme performance lights incorporate water and dust resistant components for maximum life expectancy, no matter what the conditions.

- Tough, Heavy Gauge Steel Body
- Submersible to 11.8" for Up to Two Minutes
- Advanced Heatproof Resin Reflector, Incorporating Water and Dust Resistant Breather
- Hardened Glass Lens
- Advanced IPF 65w H9 Halogen Bulb with Water and Dust Seal for Maximum Life and Performance
- Reinforced Multi Directional Mounting Base
- Waterproof Connectors on Bulb Lead and Loom Connection
- Rectangular: 6.5" h x 8.5" w x 4.5" d
- Kit Includes: 2 Lights with Weatherproof Connectors, Complete Snap Together Wiring Loom & Relay, Mouse Style LED Switch

Spot Beam ARB800XSS

IPF 900XS HID Light

Designed for serious 4WDers, these extreme performance lights incorporate water and dust resistant components for maximum life expectancy, no matter what the conditions. Sold as single lights. Wiring loom sold separately, part number (WF-3).

- Driving Beam
- Tough, Heavy Gauge Steel Body
- Advanced Heatproof Resin Reflector, Incorporating Water and Dust Resistant Breather
- Reflector Surface and Design Optimized to Bulb Design for Ultimate Performance
- Hardened Glass Lens
- Advanced IPF HID technology
- Reinforced Multi Directional Mounting Base
- Waterproof Connectors on Bulb Lead and Loom Connection
- Dimensions: Round: 8.5" h x 8" w x 4.5" d
- Includes: 1 HID light with driving lens, White IPF Cover

WARN

WXT400 HID Driving Light

Extreme durability, exceptional performance, and WARN reliability; these are the ultimate 4" HID lamps. At a mere 18 ounces they'll easily mount on bumpers, light bars, or handlebars. Low-amp-draw 40W HID lamps produce an impressive 3,225 lumens, intensely white 5,550k color, and a wide 22 degree pattern. They stand up to the harshest environments, thanks to stainless steel hardware, forged anodized aluminum housings, impact-resistant glass, and silicone seals. Installation is easy thanks to a compact shape, integrated ballasts, and through-post wiring.

4" Round Driving Beam ARB800XSS

HID Lighting

4400 Series 4" Square HID Light

The 4400 series of work lighting including the HID-4400 Euro Beam Pattern. Only weighing 1.4 lbs, the 4400 series feature an all internal ballast for a simple 2 wire hook up. Other features include a high impact nylon housing, borosilicate hardened glass lens and adjustable mounting base. A 35 Watt HID work light has never been so simple to install. Dimensions: 5" x 4.75" x 5.75"

- Universal
- Black hi-impact nylon housing With Borosilicate Hardened Glass
- Internal ballast and starter

Halogen Lighting

W650D Driving Lights

These big 6.5" (16.5 cm) halogen lights deliver outstanding performance, great value, and are ideal for increased visibility on the trail. Features include 55W H3 halogen bulbs, hardened clear glass lenses, vaporized aluminum over steel reflectors for maximum output, steel cases with a powder coated finish for great weather resistance, and a thin profile for increased mounting options. These lights also come with a wireless control switch for simple installation.

Kit contains two lights, mounting hardware, wireless control, transmitter, wiring, rock guards and covers.

82420

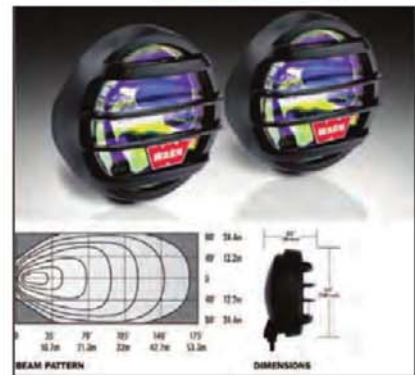

W650F Fog Beams

Designed to light the way through foggy, rainy, dusty, or snowy conditions, these fog beams feature large 6.5" (16.5 cm) diameter lenses and broad 70-degree beam spread. The hardened clear glass lenses have a dichroic coating, for a low-glare yellow light. Features include 55W H3 halogen bulbs, vaporized aluminum over steel reflectors for great light output, thin-profile powder coated steel cases for excellent water resistance, and a wireless control switch for hassle-free installation.

Kit contains two lights, mounting hardware, wireless control, transmitter, wiring, rock guards and covers.

82425

W350F Fog Beams

At 3.5" (8.9 cm) in diameter, these lights are the optimal medium-sized fog lights. The 55W H3 halogen bulb and 66-degree bar-shaped light beam deliver great low-visibility performance. Features include hardened clear glass lenses; vaporized aluminum over steel compound curve reflectors for maximum light output; and impact-resistant polymer cases with O-ring seals for excellent water resistance. These lights also have a wireless control switch, so there's need to run wires through the firewall.

Kit contains two lights, mounting hardware, wireless control, transmitter, wiring, rock guards and covers.

82410

W2030F Fog Beams

These compact 2" x 3" (5.1 cm x 7.6 cm), 55W halogen lights provide 66-degree bar-shaped beams of light, perfect for use in fog, rain, dust, or snow. Features include impact-resistant hardened blue glass lenses; durable vaporized aluminum over die-cast aluminum compound curve reflectors for maximum light output; and lightweight, corrosion resistant aluminum cases. The new wireless control switch allows for easy installation without having to drill through the firewall.

Kit contains two lights, mounting hardware, wireless control, transmitter, wiring, rock guards and covers.

82415

SDB-160 HB 100,000 CANDLEPOWER DRIVING/SPOT LIGHT

The SDB-160 HB uses a Free Curve reflector. A Free Curve reflector is very efficient because it uses the whole reflector. This allows the spot beam to illuminate approximately 770 feet ahead and the driving beam illuminates the entire surface in front of the vehicle. The SDB-160 HB has an internal light frame to protect the lamp from vibration and shock when running off-road, plus an impact resistant polycarbonate body protects the exterior. Heat and weather resistant EPT material helps protect lamp integrity. The lens of the SDB-160 HB is protected by a stone guard in a "V"-shape to let air cool the lens surface, allowing for extended operation of the lamp. Hardened glass lens has excellent heat and thermal shock resistance, strength and translucency. Easily adjustable illumination angle to 15° up or down. Dual beam control switch includes relay control feature and LED illumination when lamps are in use. Includes wiring and dash mounted control switch.

37606

Specs:
Bulb H4
Rating 12V 100/90-Watt
Max. brightness 100,000CD
Effective Range:
Driving beam 410'/125m
Spot beam 770'/235m

SDB-210 HB 200,000 CANDLEPOWER DRIVING/SPOT LIGHT

The SDB-210 HB uses a precision design Free Curve reflector that is outstandingly smooth and heat resistant. It reflects light efficiently due to the vaporized aluminum applied to the reflector surface. Drivers will appreciate a lamp with a spot beam able to illuminate approximately 853 feet ahead and a driving beam wide enough to supplement vehicle headlights by illuminating the entire surface in front of the vehicle. The SDB-210 HB has an internal light frame to protect the lamp and a stone guard to protect the lens. The body is constructed of a polycarbonate resin which has excellent impact resistance. The SDB-210 HB has weather resistant rubber seal to help protect the lamp integrity. The hardened glass lens gives excellent heat and thermal shock resistance, strength and translucency. The lamp illumination angle can be adjusted to 15° up or down to fine tune the light pattern. Dual beam control switch includes relay control feature and LED illumination when lamps are in use. Includes wiring and dash mounted control switch.

37609

Specs:
Bulb H4
Rating 12V 100/90-Watt
Max. brightness 200,000CD
Effective Range:
Spot beam 853'/260m
Driving beam 492'/150m

JW Speaker LED Fog Lights For 07-13 Jeep JK

The Model 6145 is exactly what your JK has been missing. The Model 6145 LED fog light is a replacement that retrofits stock Jeep bumper-mounted fog lights. The retrofit is an easy plug & play installation on 2007-2010, and requires simple wire splicing on 2011-2013. These LED fog lights utilize state-of-the-art projector optics to provide the superior visibility of 1,080 raw (610 effective) lumens, surpass DOT standards for on-road use, and are available in a 12V DC configuration. The UV-resistant hard-coated polycarbonate lenses, heavy-duty die-cast housings, and solid-state LEDs present the perfect solution for the rigors of off-roading.

- LEDs last up to 5X longer than standard bulbs
- Available in Clear & Smoked
- Direct OE replacement
- 10X brighter than OE

Pilot Automotive Replacement LED Tail Light

These LED tail lights bolt directly in place of the factory OE lamps. Cutting of the OE lamp pigtail is required and must be spliced onto the new assembly with included hardware. DOT & SAE compliant and meets federal regulations FMVSS108. When purchasing LED lights for your vehicle don't forget to purchase load equalizer part # CWBLE625. Without the load equalizers your turn signals will flash quickly as if you have a bad bulb.

- Fits 1976 to 2006 Wrangler and CJ

Passenger Side WANNV001
Drivers Side WANNV001L

In Pro Carwear LED Tail Lights For Jeep JK

Trail Gear LED Strips

LEDs are waterproof, sealed in a durable silicon strip, flexible, and very dependable. Unlike halogen rock lights that draw high amps, LEDs only use milliamps, so the draw on your battery and alternator is minimal. You will be amazed at how much light the LEDs actually put out. They look small, but perform big. This is the perfect light for your crawler or buggy on those night wheeling trips or just when you need some light under your rig for a trail repair. Also available in Blue, Yellow, Green and Red colors.

- Ultra low power consumption
- Extremely low 0.67A Draw

V/XHIL-TRUCK3W

12 Volt Switched Hood Light

Not all Jeeps came from the factory with an under-hood light, and the ones that did utilize a mercury switch which automatically turns the light on when the hood is tilted up. Well, if you park your Jeep on a steep enough incline the light can come on and stay on, potentially draining your battery! This 12 Volt Switched Hood Light utilizes a manual on/off switch for use only when you need it.

- Universal application
- Kit comes with light, cable mounting hardware and instructions

Vision X Intense LED Rechargeable Work Light

Anywhere work is getting done light is always a concern, will there be enough, how will it get into this tight spot, etc. Vision X introduced the HIL-WL to resolve these issues, as everyone is familiar with the traditional under hood work light that uses a standard 60watt bulb and plugs into standard 120v, but what if you need to be away from a power source or don't want to risk burning yourself; enter the HIL-WL a battery powered LED work light solves both of these issues. It's rechargeable lithium-ion battery lasts 6 hours on a single charge, allowing you to be unplugged, and by utilizing LED technology it never gets too hot to touch. Shatter proof Housing, built-in hanging hook, rubber handle and top, sixty Bright 5mm LEDs to illuminate anything it's put up against.

- Ultimate high powered lithium-ion work light
- Rubberized sure grip no-roll ergonomic handle
- Work light face or flashlight head
- Industries brightest work light @ 250 lumens
- 120 degree LED beam for illuminating wide areas

WeatherTech®

WeatherTech LampGard Protector

Protect your expensive headlamps, before it's too late! Introducing LampGard™, an incredibly tough 40 mil. thick, double-polished urethane material that is optically clear and applies (peel & stick) directly to the surface. This product has built-in ultraviolet inhibitors that help prevent the material from drying, hardening or discoloring. We custom die-cut to fit your specific vehicle for a precise, perfect fit. LampGard™ comes with easy-to-follow instructions and applies to headlamps, fog lamps, turn indicators and parking lights (when applicable) to protect them from scratching, cracking and pitting. LampGard™ is available for most vehicle makes and models.

WEAH2012DW

TruckLite Pulse Width Modulation Harness Adapter

Truck-Lite is offering a Pulse Width Modulation (PWM) Adapter Harness that eliminates headlight flicker in 2007 - present Jeep J/K models. The flicker that some Jeep J/K users may see is the result of the PWM electrical system used on these models.

PO196830
